

Dispatch software built by truckers, for truckers

Simple, affordable software for managing driver jobs, load instructions, messages and job history - built around how haulage actually works.

The daily dispatch problem

Many haulage teams still rely on phone calls, paper notes, WhatsApp messages and memory. That works until a load changes, a message gets missed, or nobody has a clear record.

**Less chasing. Less confusion.
Clearer dispatch.**

What HGSS gives you

- **Dispatcher board** to create and manage work
- **Driver load screens** with clear job details
- **Message tracking** so updates are recorded
- **Load history** for better oversight
- **Admin controls** and basic company branding

Founding Fleet Plan

£99 / month

No setup fee for early partner companies.

Includes dispatcher access, driver load screens, job/load creation, message tracking, load history, admin controls and basic company branding.

Price locked for 12 months. Cancel any time with 30 days notice.
